

## Eight Steps to Balancing

### ① Record Interest Earned

In your checkbook register, enter all of the interest earned on your account (if applicable). The interest earned will appear on the front of your statement.

Add this balance. Be sure to record any other credit amounts listed, such as corrections by the institution.

### ② Record Service Charges, Etc.

In your checkbook register, record any charges that have been subtracted from your account, as shown on your statement. These charges may include:

- Monthly services charges
- Per check charges
- ATM transaction charges
- Non-sufficient Funds fees

Subtract these charges from your register balance.

“New” Checkbook Balance	

### ③ Verify Deposit Amounts

Look at your latest statement and verify that all deposits listed match the deposit amounts listed in your checkbook register.

Make a list of any deposits that are listed in your register but do not appear on your statement. Add these together. **Tip:** Use the worksheet on the back of your statement.

Date	Outstanding Deposits	Amount
Total		

### ④ Match All Check Entries

Match the entries in your register with the transactions listed on your statement. Compare check numbers, dates, and dollar amounts on all checks written. If these items match, place a check “✓” mark next to the transaction in both your register and on the statement.

If they, don’t match, circle the item in both places so that you can come back to fix the error once all of the transactions have been checked off.

## ***If Transactions Don't Match***

Check for one of three errors:

1. The item was recorded incorrectly in your checkbook register,
2. The item paid or was credited to your account for the wrong amount, or
3. Your check numbers were listed incorrectly.

## ***To Correct the Errors***

1. Simply look at and/or recheck your canceled checks or check images, deposit receipts, and/or ATM and Visa Check Card receipts.
2. Remember some items will not be checked off. These are called “**outstanding items.**”

**Note:** If you do not have cancelled checks or images returned with your statement, contact your branch and have them send a copy of the item in question.

### ⑤ Check for Outstanding Items from Previous Statements

Be sure that all of the outstanding items from your previous statements have been included in this statement. Otherwise, they are still outstanding.

**Note:** If an item is outstanding for 60 days or more, contact the person or company you wrote the check to and see if the check has been received. If it hasn't, the check may have been lost and you may want to call the institution and place a stop payment.

### ⑥ Verify Other Debits on Statement

Verify that additional withdrawals listed on your statement, other than checks, are charged for the amount actually drawn. This includes ATM withdrawals, Visa Check Card transactions and any automatic debit transactions like insurance payments, loan and/or utility payments.

### ⑦ List All Outstanding Checks

Make a list of all outstanding checks or ATM/Visa Check card withdrawals. These are transactions that appear in your checkbook register that do not have a check “✓” mark next to them. Add these items together. **Tip:** Use the worksheet on the back of your statement.

## ⑧ Balance

Now, balance your checkbook register to your statement. Use the formula below, which is also located on the worksheet on the back of your statement.

Statement Ending Balance	
ADD (+) Deposits Shown in Checkbook Register But Not on Statement	
<b>Subtotal</b>	
MINUS (-) Total Outstanding Checks	
<b>Total</b>	\$

Compare this total with the ending balance in your checkbook register. They should be the same. If not, there's a mistake. **Do Not Panic!** This can be easily fixed. If they are the same Congratulations! You've successfully balanced your checkbook.

### If Things Don't Add Up

- Take a short break to clear your head.
- Start by re-verifying your outstanding items.
- What's the difference? Is your checkbook balance higher or lower than your statement? Subtract the smaller figure from the larger one to get the difference. Now...
  - Divide the difference by 9. If 9 goes in evenly (that is, with nothing left over), the problem is transposed numbers. For example, \$258 was recorded as \$285. Look over your receipts and cancelled checks and double-check your amounts.
  - Divide the difference by 2. If the answer you get is a "normal" dollars-and-cents amount (i.e., \$7.19 rather than \$15.125), look for that amount in your register---it was added instead of subtracted, or vice versa.

### Still Doesn't Balance?

Well, you've tried hard and made every effort. Now it's time to ask for help. Call or come by one of our branches. You will need to bring in your current statement and your checkbook register. Every effort will be made to assist you to balance, and next time it will be easier.
